

Dear Sir/Ma'am,

I worked in the Development field for 5+ years, and initially started my career as a Front-End Developer, and eventually got into Back-End Development. Right now, I am working as a Software Engineer at Getonnet Norge (Norway) remotely from Bangladesh.

I have expertise in technologies like, PHP, Laravel, MySQL, Node.JS, React.JS, Mongo DB, Vue.JS. Few of my successful larger project to mention is an E-Commence solution (Sylheti Bazar), POS and Inventory System for Small & Medium businesses (Cash Army), and finally working on a EPR system for a university.

In current company, I design the architect of a system and work through the full development process. And also manage teams to deliver the product within time with proper outcome.

I am hoping if you find me suitable for the position, we may talk further. I am looking forward to hearing from you.

Sincerely yours,

Nazmul Hossain
